Our DNA...

A glowing DNA double helix structure is shown against a dark background. The structure is illuminated with vibrant blue and orange light, creating a sense of depth and complexity. The helix is composed of numerous small, interconnected points and lines, giving it a textured, almost crystalline appearance. The lighting is dramatic, with bright highlights and deep shadows, emphasizing the three-dimensional nature of the molecule.

**You are a beloved child of God
You have been created with purpose
You bring delight to the world
When you live out of love and offer your gifts
You are seen and known and valued.**
